Summary

A creative and detail oriented full stack engineer with hands on experience in building scalable mobile and web applications in transportation, fintech and interactive platform spaces. An expert in developing responsive frontend interfaces, integrating backend APIs, and implementing real-time features. Passionate about building user-centric digital products, providing high quality UI implementations, optimizing application performances and continuously growing technical expertise.

Experience

Creastech Limited, Nigeria

Frontend Engineer | December 2025 – Present

- Developed and maintained responsive frontend features for XPay mobile application using Flutter with emphasis on smooth user experience and clean UI implementation.
- Integrated front end interfaces with back end APIs for authentication, wallet operations, bill payments, transfers and transaction management functionalities.
- Implemented user facing features like real time transaction status, form validation, secure authentication flows and screens related to payments.
- Worked closely with backend and product teams to optimize app performance, fix production issues and improve overall application stability on Android devices.

Movr Technologies Ltd, Nigeria

Full Stack Engineer | July 2024 – Present

- Developed and maintained mobile frontend features for Movr using Flutter, including authentication, trip booking and user onboarding flows.
- Developed a Flutter application integrated with Django Rest APIs for real time data exchange, authentication and trip management features.
- Implemented map and real-time tracking using WebSockets and location services to provide live driver and trip updates.
- Debugged and optimized application performance, payment integrations, and production build configurations in Android, iOS and Flutter environments.

Maliyo Game Studio, Nigeria

Game Developer | July 2023–Jan 2024

- Led a team of 5 developers to design, build, and deliver 5 mobile games, all successfully published on the Google Play Store.
- Enhanced gameplay performance and reduced bugs by 30% through optimized C# scripts and iterative testing.
- Improved team delivery speed by 20% through structured task delegation and sprint planning.
- Boosted user engagement by implementing interactive UI/UX elements and optimized animations.

SQI College of ICT, Nigeria

Mobile Frontend Developer | Jun 2022–Jan 2023

- Collaborated with designers and backend developers to implement responsive interfaces for web and mobile applications.
- Improved page load performance by up to 25% using best-practice optimization techniques (minification, lazy loading).
- Developed reusable UI components, reducing development time for subsequent features by 15–20%.
- Successfully integrated multiple REST APIs for seamless user experience across products.

RAINigeria, Nigeria

Robotic Engineering | Jan 2021 – May 2021

- Contributed to CAD modeling, sensor integration, microcontroller programming, and robotic system testing.
- Assisted in the development of prototype robotic systems, improving sensor accuracy by 15% through calibration and troubleshooting.
- Conducted real-world and simulated performance testing, reducing system errors by 10% through iterative adjustments.

Skills

HTML, CSS, JavaScript, TypeScript, React.js, Tailwind CSS, Flutter, Node.js, Python, Unity, C#, C++, WebSocket, Docker, AWS, API Integration, UI Optimization, Version Control (Git), Communication, Teamwork, Leadership, Creativity, Critical Thinking.

Education

Dominion University,
Bachelor of Computer Science

2021–2025
